

REACH Declaration

The European Chemicals Regulation REACH 1907/2006 is intended to ensure a high level of protection for people and the environment. According to REACH, manufacturers, importers and downstream users have to register their chemicals and are responsible for their safe treatment.

PeakTech Prüf- und Messtechnik GmbH markets no preparations according to article 31, therefore no chemical liquid, mixture, acidity, leach, solvent, paint, which require a separate safety data sheet. Furthermore, upon predictable and intended use of our products, no substances, which could rank among the REACH declaration, are released.

For all products according to article 33, our suppliers were obliged not to use critical substances of the SVHC list in critical amounts according to the REACH regulation and, if possible, not to use these substances at all.

Therefore, PeakTech Prüf- und Messtechnik GmbH assures that according to the current state of knowledge none of our products contain one or more SVHC substances which could exceed the limit of the REACH regulation.

PeakTech Prüf- und Messtechnik GmbH will inform their customers unsolicited as soon as some information infers that listed SVHC substances contained in the products exceed the limit, as per REACH defined concentration of 0.1 % (w/w).
