Description

Laboratory decade with rotary switch for production testing, teaching aids, research and development. You can set all resistance values between 0.1 nF to 11.111µF with high precision in 0.1 nF steps to get the desired value quickly and user-friendly. The angled plastic housing ensures a clear arrangement of the rotary switches, whereby the test leads are connected via 4mm safety sockets.

Technical features

- High accuracy
- Plastic housing guarantees perfect shielding
- 0.1nF resolution
- 4 mm safety sockets
- Accessories: manual
