

«PeakTech® P 1070» 300V AC / DC digital multimeter ~ 2000 digit LCD

€17.90

Prices excl. VAT plus shipping costs and possibly lower value surcharge

Product number: P 1070

GTIN/EAN: 4250569400100

Description

The PeakTech 1070 impresses with its excellent price / performance ratio as a TÜV / GS-approved multimeter for the hobby electronics engineer or training area. In addition to the extensive measurement functions for direct / alternating voltage, direct current and resistance, this model has a fast-responding continuity test with an acoustic signal and a diode test. In addition, this model has a temperature measurement function with the enclosed wire sensor, which offers a useful addition to the measurement functions, especially for the hobby area. The measuring range is selected manually, which means that this multimeter displays a measured value particularly quickly.

Technical features

- Inexpensive digital multimeter for hobby and training
- 2000 digit LCD display
- DC and AC voltage measurements up to 300V
- μ A, mA and A direct current measurements
- Fast continuity test with acoustic signal
- Resistance measurement function and diode test
- Temperature measuring function with enclosed wire sensor
- Safety: TÜV / GS; EN-61010-1; CAT III 300 V
- Accessories: test leads, type K thermal wire sensor, battery and manual

Specifications

Basic Accuracy DC: +/- 0,5%

Digital counts: 2.000

Display Type: LCD

GS - Tested safety:

Over voltage category: CAT III 300 V

Range selection: Manual

V DC max.: 300V

OHM max.: 2000 kΩ

Temp. max.: 1000 °C

Temp. min.: 0 °C

mA DC max.: 200mA

μA DC max.: 2000 μA

V AC max.: 300 V

A DC max.: 10A
