«PeakTech® P 2695» Insulation tester 125/250/500/1000 V /4000 MΩ

€174.90

Prices excl. VAT plus shipping costs and possibly lower value surcharge

Product number: P 2695

GTIN/EAN: 4250569400544

Description

This digital insulation measuring device is required for various measurements of lines, components and their insulation. The required voltage for the insulation measurement can be set using the rotary switch. By pressing the test button, the set voltage is output and the device / line to be measured is checked. Four voltage values can be selected for the insulation measurement function to cover any type of test. Other functions of the PeakTech 2695 are, for example, DC, AC voltage and resistance measurement. In order to ensure safe working, there is a locking button, which prevents the device from outputting a voltage of up to 1000V by accidentally pressing a button.

Technical features

- Professional insulation measuring device with up to 1000V test voltage
- Large LCD dual display (max. 3999) with backlight
- MIN / MAX and measurement hold function
- Automatic discharge of capacitors (capacitive voltage)
- Automatic detection of circuits with a voltage above 30 V.
- Battery status indicator
- Automatic switch-off
- Safety: TÜV / GS, EN-61010-1; CAT III 1000 V
- Accessories: case, batteries, test leads and manual

PeakTech®

Specifications

Digital counts:	4.000
Display Type:	LCD
GS - Tested safety:	■
Over voltage category:	CAT III 1000 V
Test voltage:	125 V, 250 V, 500 V, 1000 V
OHM max.:	4000 MΩ
