«PeakTech® P 1094» 12 ... 400V AC/DC - Voltage Tester with LED-Display

€16.50

Prices excl. VAT plus shipping costs and possibly lower value surcharge

Product number: P 1094

GTIN/EAN: 4250569407413

Description

The PeakTech 1094 is a reliable and robust two-pole voltage tester that has been specially developed for the safe and precise measurement of AC and DC voltages in the 12V to 400V range. Thanks to its good workmanship and user-friendly handling, it is suitable for professional use in electrical engineering as well as for DIY enthusiasts and craftsmen who prioritise the highest safety standards. This voltage tester does not require batteries and is therefore always ready for use. Its LED display shows the measured voltage values clearly and distinctly, enabling quick and safe voltage testing. The graduations of 12V, 24V, 50V, 120V, 230V and 400V ensure precise measurement in various areas of application, from household installations to industrial systems. A special safety feature of the PeakTech 1094 is the integrated acoustic warning from a voltage of 50V. As this voltage exceeds the Extra Low Voltage (ELV) limit, the user is warned by an acoustic signal to minimise the risk of electric shock. This provides additional protection and ensures greater safety when working with electrical equipment. With its IP54 protection class, it meets the highest safety requirements and reliably protects the appliance against the ingress of dust and splash water. The ergonomic design of the device ensures comfortable handling, even during long periods of use. The rubberised surface offers a non-slip grip so that safe working is possible even under demanding conditions.

Specifications

Display Type:	LED
Ingress protection:	IP 54
LED-lamp:	■
Over voltage category:	CAT III 400 V
V DC max.:	400V
V AC max.:	400 V
