Description

This clamp adapter is a transducer that enables measurements up to 1000 A AC / DC with a frequency up to 400 Hz in connection with a multimeter. With current measurements using a clamp adapter, no switching interruption or removal of the insulation is necessary. The pliers adapter is provided with a hand edge protection, which ensures safe working. With the current clamp adapter, it is possible to carry out measurements on cables with a diameter up to 57 mm. The input resistance of the device is 1MΩ and the output factor is 1mV / A (1000: 1).

Technical features

- Output factor: 1mV / A
