Description

Professional digital multimeter with a large, easy-to-read and illuminated LCD display for electronics professionals, service technicians, trainees or hobby users. The automatic measuring range selection ensures user-friendly operation, only the measuring function has to be selected, but not the exact measuring range. In addition to the extensive measurement functions for voltage, current, capacity, frequency, temperature and resistance, this model has a continuity test with an acoustic signal and the possibility of performing diode tests. Special protection is guaranteed by the housing, which is provided with a sprayed-on rubber coating and is protected against fall damage. In addition, the housing has an IP 67 protection class, which means that the device is dust and waterproofed. The user safety is guaranteed via the CAT III 1000V overvoltage category.

Technical features

- 3 3/4 digit, 27 mm backlit LCD display; Max. Display: 4000
- IP67 dust and waterproof
- Relative value measurement function
- Continuity test and diode test
- Data hold
- Automatic and manual range selection
- Automatic shutdown
